

*My client's  
comfort is of  
the utmost  
importance  
to me...*

I absolutely LOVE the **bodyCushions**! Before I even graduated from massage school I knew that the cushions were something that I would integrate into my practice. My client's comfort is of utmost importance to me... with a little touch of heat and the lushness of the cushions; my clients enjoy not just a massage, but an EXPERIENCE. They appreciate the extra touch during their massage sessions. I share the knowledge that the cushions allow their spine to rest in its natural S-curve, allowing each area of their spine to decompress slowly, and allows all of their muscles to rest without any awkward muscle patterns, getting them to a relaxed state exponentially faster! Of the over 1000 clients that I have seen through my practice, EVERYONE LOVES THEM! The **bodyCushions** are addicting...

Thank you!

My only request is that you make mattresses. They are perfect to sleep upon!
